MAP OF JAMESTOWN

How to Make the Map

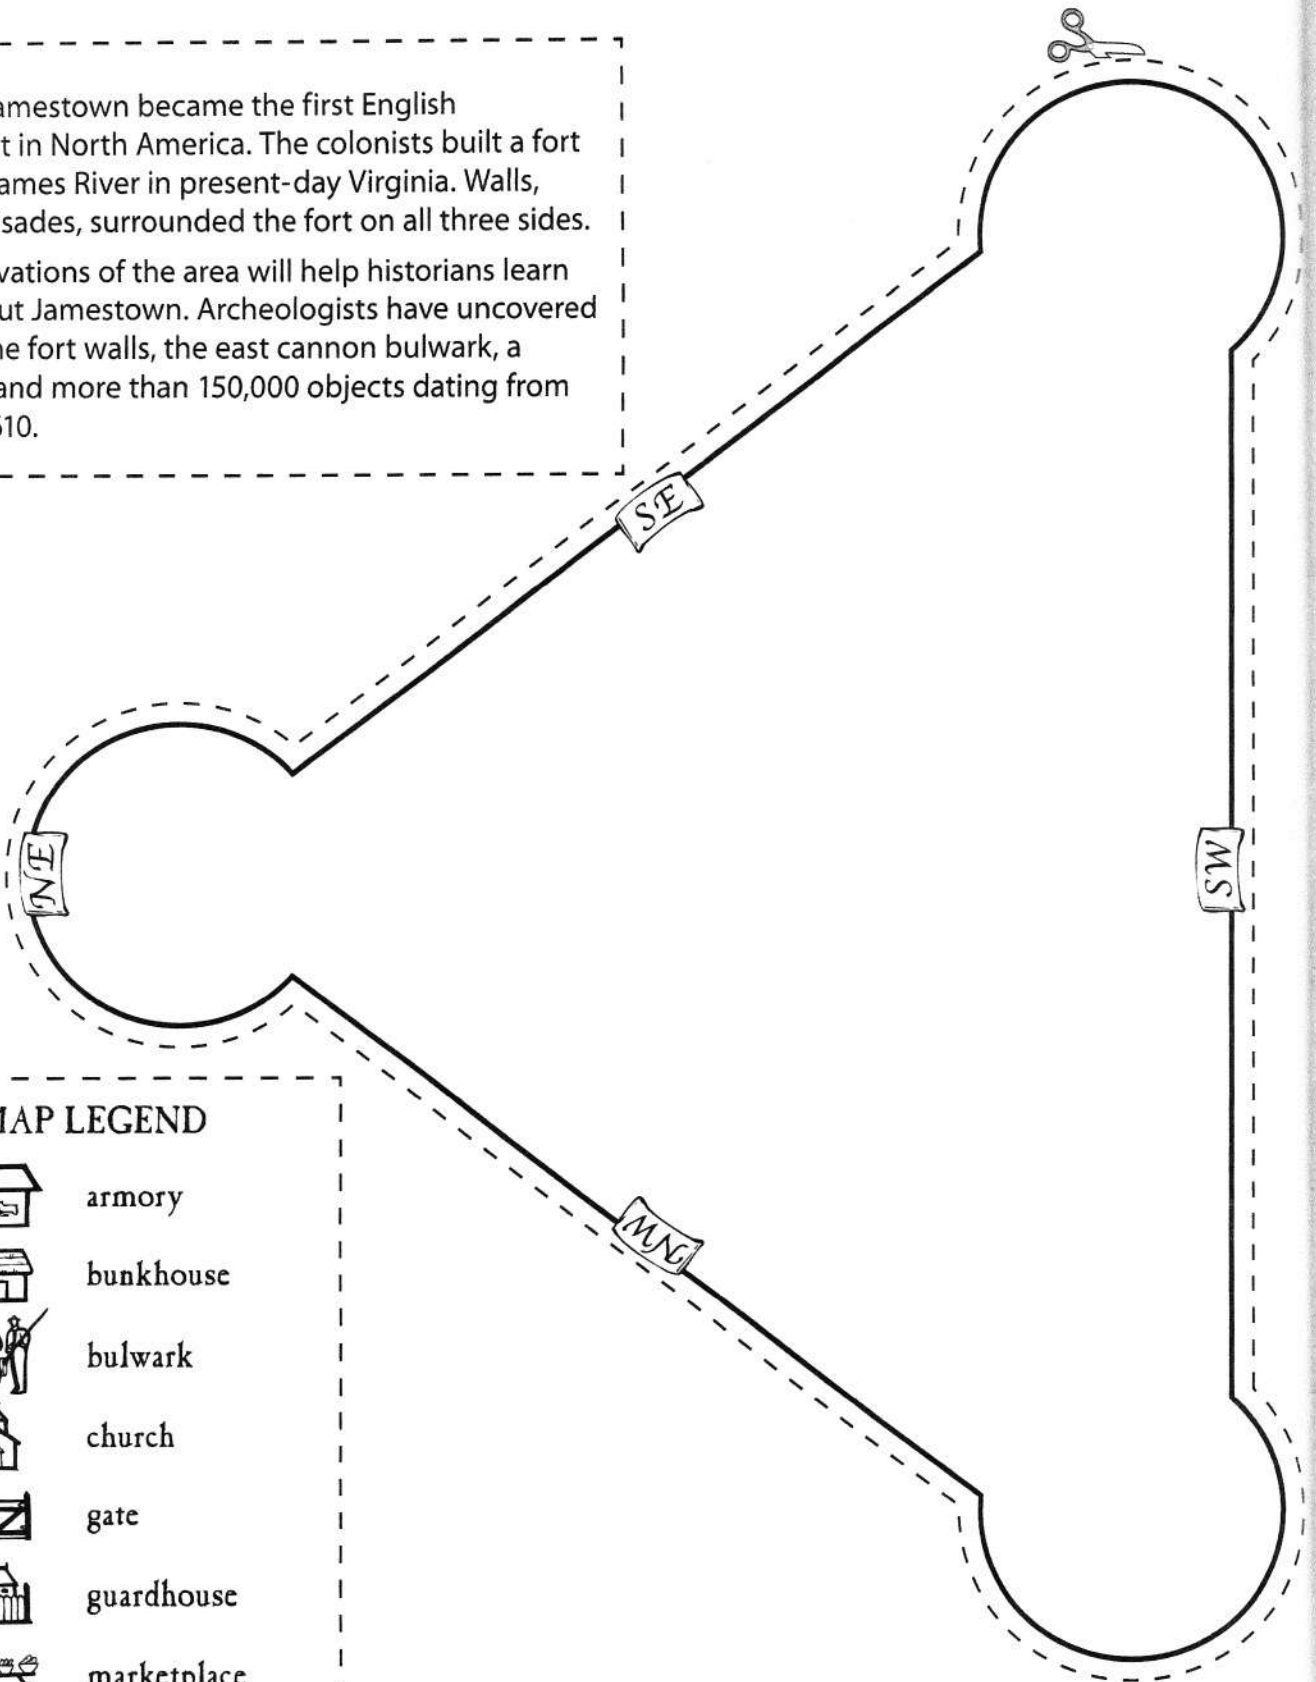

Follow the directions below to add buildings to the map of Jamestown. Use the map legend as a guide for drawing the buildings.

1. Draw and color the **church** in the center of the fort. From 1607 until the 1750s, Jamestown went through five churches.
2. Draw and color the **marketplace** located directly in front (southwest) of the church. The marketplace was where people met to trade goods and to learn about news.
3. Draw and color the **armory** northwest of the marketplace. The armory stored the weapons for the fort. Weapons included halberds (axes), pikes (spears), muskets, and some armor.
4. Draw and color the **guardhouse** northwest of the armory near the palisade. The guardhouse was where the guards stayed and protected the fort.
5. Draw and label the **storehouse** southeast of the marketplace. The storehouse contained the colonists' most important belongings and the food for the fort.
6. Draw and color the **bunkhouses** on all three sides of the fort close to the fence lines. Historians think 20 bunkhouses were built. They were small, one-room houses shared by six to eight men. There were no women or children when the fort was first built.
7. Draw and color a cannon on each of the **bulwarks** located on the three corners of the fort. Bulwarks were the raised areas where cannons were placed.
8. Draw and color the main **gate** to the fort on the southwest palisade. Two smaller gates were located on the west and south parts of the palisade. A third smaller gate was located on the east part of the palisade.

MAP OF JAMESTOWN

In 1607 Jamestown became the first English settlement in North America. The colonists built a fort near the James River in present-day Virginia. Walls, called palisades, surrounded the fort on all three sides.

New excavations of the area will help historians learn more about Jamestown. Archeologists have uncovered parts of the fort walls, the east cannon bulwark, a building, and more than 150,000 objects dating from 1607 to 1610.
